NRCS – WY reorganization plan:

WY-NRCS is moving to a team structure. There will be 1 supervisory DC covering Albany, Laramie and Carbon Counties.

Each employee will receive a letter describing the proposed future of their position.

If they are reassigned – they will have until 9/2027 to relocate.

The current staffing plan does not consider the number of acres only the number of plans – this is very detrimental to WY. The staffing criteria puts us at 75 employees – we currently have 90. Jackie worked with leadership and got approval for 90 for now.
